

**Experience :** We are in the business of Web Hosting, Web Designing and Website Promotion since 1998 Serving 10,000+ Websites and having our SELF OWNED Server farm in USA.

### **Knowledge :**

We have developed a comprehensive ready to move in Online Catalogue and Shopping system with great understanding of Online Business Environment. We analyze our client requirement and work accordingly.

### **Infrastructure :**

We run our self owned server farm in USA and have a Highly Professional Team of Developers who are working on this project to make it more robust and scalable. One can reap the benefits of our experience and use our services rather looking for a novice programmer to develop an eCommerce system and then always looking at him for support. You cannot make your business depend upon one person but with us it is different as we are a company already in this business since last 10+ years and already hosting more than 10,000 websites.

### **Dependability and Security :**

We serve top most corporate and business houses of the nation and understand the word ethics and Honesty to its core. We also enjoy the position of being Accredited Registrar for .IN Domains in India thus you can understand how safe and secure your business is as we have served big names by booking domains for them. We believe that you can now safely your existence is safe and secure. Security issues are taken care of by us. You have to simply report a bug and we will be there at your rescue. No more worrying about how will things work, will someone hack my system, what about backup's-are they secure, what about patches-how will they be installed and while doing can they corrupt my data. All this will be taken care of by us. There is a rider to all this depending upon the amount of maintenance. If the needed attention is more and online business is huge then we can discuss and for a small charge on monthly basis for maintenance we can depute a person who can take care of your online business dedicatedly. All this is as per the merits of the case and not a blanket cost for all our store owners. For most we will be doing all the backups and upgrades.

### **Price :**

We are very economically priced. No more expenses to host or develop or upgrade. Check our price structure. If that's a significant expense for your business, you need to look into improving your profit margin.

### **Support :**

There are many such software vendors but are there any competent one's in India who have focused on Indian Customers and understand offline business fully as we do for the reason that out of 25 years of our business experience we have been doing offline business for 10 years in Delhi/NCR India and do understand the customers mental block to acceptance of online media. We work as if in foot steps of the buyers keeping in view points of the seller and there devising online marketing plans for our store owners so that they can penetrate the customers mind. We not only support the software but suggest other means to make it secure, scalable and stable. We help you to maintain 24 hours backup of your store within the same server and on back up servers too.

### **Installation :**

When you buy hosted software like ours on a subscription plan, installation is already done and support is included. When you have an issue—and have you ever had software that you didn't have an issue with at least once?—you don't have to pay a developer thousands of rupees an hour to make it go away.

### **Peace of mind**

We can enumerate 100's of reasons as to why you should avail our services but nothing will give you more surety unless you use our services and find yourself having a good feeling of being in safe hands.
